GERATY'S FROST-PROOF CABBAGE PLANTS

Guarantee Early Crops and Doubled Profits

All of Geraty's Cabbage Plants are grown on Yonges Island, off the coast of South Carolina. Constant low temperatures in early spring, coupled with difficult growing conditions, give the plants great resistance to cold and bad weather.

We guarantee our plants to live at any temperature exceeding 29 degrees above zero. Many times plants of ours have been exposed to 10 degrees above zero (more than 20 degrees below freezing) and have entirely escaped injury.

YOU GAIN THREE WEEKS

Vegetables sold early in the season bring many times the price of those marketed several weeks later. That's why Geraty's Frost-proof Cabbage Plants are so profitable for the gardener; they produce full-grown heads three weeks before plants which have been home-grown. We have been growing Cabbage Plants for more than fifty years, and because of our careful selection of seed you frequently get

Guarantee

If the increased yield of beaded Cabbage from our plants, compared with the yield from cheaper plants of same varieties sold by others, planted at the same time and grown under the same conditions, is not worth more than the difference in cost, we will refund the entire purchase price. There is over a half century's reputation of honest dealing behind this guarantee.

TWICE AS MUCH CABBAGE PER ACRE

We know how to produce good plants; you'll find no runts or weaklings among those you purchase; practically every one makes good. You'll easily get from 6 to 10 tons of Cabbage for each acre you plant.

When the plants come to you they look stunted and wilted, but don't bother about the appearance; plant all of them just the same. Place them in the ground a month before you'd set out home-grown plants, and then forget about them. Order now and be sure of Cabbage profits this season. Our guarantee protects you perfectly.

We can supply the best commercial varieties: Early Jersey Wakefield, Charleston Large Type Wakefield, Copenhagen Market, Succession and Early Flat Dutch from December 1 to May 1.

Prices by parcel post, postpaid. In lots of 100, 200, 300, or 400 plants, at 50 cts. per 100 plants; 500 plants for \$1.60; 1,000 or more at \$3 per 1,000 plants.

Orders are filled by the 100, not 250 or 350. These prices are for even quantities of one variety to package; if you ordered 200 of one variety and 300 of another variety, you would pay at the 100 rate.

Prices by express, buyer paying express charges. In lots of 1,000 to 3,000 plants at \$2 per 1,000; 5,000 or more at \$1.50 per 1,000. Plants packed for express shipment, 1,000 or 2,000 plants of a variety to package. They weigh about 25 pounds per thousand plants, packed for shipment. Terms cash with order. No plants shipped C. O. D.

Our Frost-Proof Onion Plants

Prizetaker

are more hardy than our cabbage plants. They should be set out at the same time. Our onion plants produce earlier and larger onions than can be grown from sets, they do not run to seed like the sets.

We offer four varieties.

Crystal Wax Bermuda

The most attractive onion grown, a pure white waxy appearance with very mild flavor.

Yellow Bermuda

Is a light yellow or straw color with mild flavor similar to Crystal Wax in every way except color.

Prizetaker A light straw-colored onion with pure white flesh, very fine grain, mild flavored, and will keep any reasonable length of time. It is very large size often measuring 10 to 15 inches in circumference and have been raised to weigh 4 to 5 pounds.

This is a distinct variety developed and grown in Louisiana for more than 50 years. The skin is a brownish red, flesh solid, fine grained, strong in flavor, best keeping qualities of any onion grown.

Prices and shipping conditions on onion plants are the same as on our Frost-Proof Cabbage Plants.

(OVER)

WM. C. GERATY CO.'S FROST-PROOF CABBAGE PLANTS

Are guaranteed to stand 20 degrees above zero. In the Southern States they should be planted during Dec., Jan., and Feb. In the Northern States and Canada just as soon in the Spring as the land thaws out enough to get the plant roots in the soil. The land freezing after the plants are planted or same being covered with sleet or snow will not kill these plants. If planted early, they will mature heads two to three weeks ahead of your home grown plants. Can ship plants from Dec. 1st to May 1st.

Varieties: Early Jersey Wakefield, Charleston Wakefield, Succession, and Early Flat Dutch. Terms: Cash with order.

Prices: By parcel post in lots of 100, 200, 300, or 400, at 50 cts. per 100 plants, 500 for \$1.60, 1,000 or more at \$3 per 1,000 plants, postpaid.

Prices: By express, customer paying express charges. In lots of 1,000 to 4,000 plants at \$2 per 1,000, 5,000 or more at \$1.50 per 1,000.
